

# ICD-10 Dental Diagnosis Codes

Quick Reference

Though dental practitioners are not required to include a diagnosis code when submitting claims to Vermont Medicaid, if they choose to include codes, they must be valid. For claims with dates of service prior to September 30, 2015, a valid ICD-9 code should be used and for claims with dates of service on or after October 1, 2015, a valid ICD-10 should be used. This document includes a sample of common dental ICD-10 diagnosis codes, code descriptions and some ICD-10 resources to help you understand code selections and usage for both electronic and paper submissions.

*The use of appropriate diagnosis codes is the sole responsibility of the dental provider. All links to third-party websites are listed for convenience only and are not endorsed by Vermont Medicaid.*

| ICD-10 Code | Description  | ICD-10 Code | Description   |
|-------------|--|-------------|---|
| K00.1       | Supernumerary teeth  | Z01.21      | Encounter for dental examination and cleaning with abnormal findings  |
| K00.2       | Abnormalities of size and form of teeth                              | K04.1       | Necrosis of pulp  |
| K00.3       | Mottled teeth  | K04.2       | Pulp degeneration   |
| K00.4       | Disturbances in tooth formation                                      | K04.3       | Abnormal hard tissue formation in pulp                                |
| K00.5       | Hereditary disturbances in tooth structure, not elsewhere classified | K04.4       | Acute apical periodontitis of pulpal origin                           |
| K00.6       | Disturbances in tooth eruption                                       | K04.7       | Periapical abscess without sinus                                      |
| K01.0       | Embedded teeth   | K05.4       | Periodontosis   |
| K01.1       | Impacted teeth   | K03.6       | Deposits [accretions] on teeth  |
| K02.61      | Dental caries on smooth surface limited to enamel                    | K05.5       | Other periodontal diseases  |
| K02.62      | Dental caries on smooth surface penetrating into dentin              | K06.1       | Gingival enlargement  |
| K03.0       | Excessive attrition of teeth   | K06.2       | Gingival and edentulous alveolar ridge lesions associated with trauma |
| K03.0       | Excessive attrition of teeth   | M26.01      | Maxillary hyperplasia   |
| K03.1       | Abrasion of teeth  | M26.03      | Mandibular hyperplasia  |
| K03.2       | Erosion of teeth   | M26.02      | Maxillary hypoplasia  |
| K03.3       | Pathological resorption of teeth                                     | M26.04      | Mandibular hypoplasia   |
| K09.1       | Developmental (nonodontogenic) cysts of oral region                  | Z46.4       | Encounter for fitting and adjustment of orthodontic device            |

| <b>ICD-10 Code</b> | <b>Description</b>  | <b>ICD-10 Code</b> | <b>Description</b>   |
|--------------------|---|--------------------|--|
| Z01.20             | Encounter for dental examination and cleaning without abnormal findings | Z46.4              | Encounter for fitting and adjustment of orthodontic device           |
| M27.51             | Perforation of root canal space due to endodontic treatment             | K08.419            | Partial loss of teeth due to trauma, unspecified class               |
| M27.52             | Endodontic overfill   | K08.429            | Partial loss of teeth due to periodontal diseases, unspecified class |
| K08.439            | Partial loss of teeth due to caries, unspecified class                  |                    |  |
